<b>Office Action Summary</b>	<b>Application No.</b> 10/635,199	<b>Applicant(s)</b> HIND ET AL.	
	<b>Examiner</b> William H. Wood	<b>Art Unit</b> 2193	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

Claims 1-9 are pending and have been examined.

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. No disclosure in the original disclosure of "predicting an impact on the profile" (numerous claims) or "without running the executing application again" (found in claim 9).

3. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. No disclosure in the original

disclosure of “predicting an impact on the profile” (numerous claims) or  
“without running the executing application again” (found in claim 9).

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by **Romer** et al., “Instrumentation and Optimization of Win32/Intel Executables Using Etch”, 08/1997. The rejections can be found in the previous office actions.

***Response to Arguments***

6. Applicant's arguments filed 18 July 2006 have been fully considered but they are not persuasive. Applicant argues **Romer** does not disclose “predicting an impact on the profile”. As the executable is optimized and manipulated so will be the profile of that executable. Therefore, **Romer** does indicate predicting with regard to the executable. Additionally, the executable in the case of **Romer** is the vehicle for the profile (page 2, right column, second paragraph, “instrumentation module has the opportunity to instruct Etch to

Art Unit: 2193

examine and possibly modify the executable, e.g., to insert measurement instructions"). Therefore, the arguments are not persuasive and the rejections are maintained.
